WELCOME TO OUR 2014 STUDENT AMBASSADORS

This year we welcome nine Student Ambassadors to the Holmesglen team.

Our ambassadors will work at all major expos, help out at Open Days, attend school events and are available to speak to your students about their experience at Holmesglen.

If you would like a student ambassador to attend your school expo or be part of a presentation please feel free to contact:

Esther Perkins

Michael Iudica
Bachelor of Construction Economics

Ellen Houston
Diploma of Screen Media

Caue Dos Santos Motta
Diploma of Software Development

Alexandra White
Diploma of Business (Marketing)

Bobbi-Jo Smith
Diploma of Community Services Work
Holmesglen’s Hospitality Students Feed the Masses at Multicultural Week

Recently Holmesglen celebrated its diverse range of cultures during Multicultural week. Throughout the week, students were fed wood fired pizzas that were cooked and served by some of the hospitality students here at Holmesglen.

At the Waverley campus, students from the VCAL program took control of the pizza ovens whilst at the Moorabbin campus the Certificate IV in Cookery class cooked for the students.

Over the two days the Hospitality students fed over 300 hungry people at Holmesglen!

Throughout the week students were treated to a variety of on campus activities, origami making, Brazilian drumming, didgeridoo playing and Indian head massages!

CSI, BODY OF PROOF, SILENT WITNESS - HAVE YOU EVER CONSIDERED BECOMING A FORENSIC SCIENTIST?

Starting in 2015, the University of Canberra will be adding another degree at Holmesglen’s Moorabbin campus, the Bachelor of Applied Science in Forensic Studies.

This course is ideal for students who have an interest in science and are looking to pursue an applied laboratory career. Students will begin by building a strong foundation in the biological and chemical sciences and then move onto specialist forensic subjects such as forensic evidence and the law, forensic statistics, toxicology and specialised chemical and biological analyses. The program will cover areas such as collection and examination of evidence and the interpretation and reporting of results.

A forensic scientist’s role is to present objective evidence and opinions that will assist the court with making decisions in a case. Students will learn the necessary skills required to apply scientific principles and techniques in the investigation of criminal acts.

There are a variety of different places a forensic scientist may end up working from a natural disaster site to a crime scene.

Students who are interested in this course will need to meet the following pre requisites: Units 3/4 Chemistry and/or Biology and a VCE Mathematics. Application is via VTAC for a 2015 start.

WANTED
STUDENTS LOOKING TO START A CAREER IN THE BUILDING TRADES INDUSTRY

Holmesglen in conjunction with the Australian Brick and Blocklaying Training association will be offering free Bricklaying workshops at the Chadstone campus.

These workshops are open to students in years 10 and 11 who want to begin an apprenticeship in the building industry.

During these workshops students will learn a variety of skills required to be a bricklayer including, how to read and interpret plans, how to use hand tools and various OHS requirements.

For more information about the times and dates of these workshops please contact: Glenn McGill
