If you are interested in game development, digital media, animation and programming, then this program is for you.

Over the course of this program you will learn introductory skills and knowledge to be confident in using industry standard 3D modelling and game design software.

Using 3D programs and game engines you will acquire skills to develop 3D assets and games, learning to deploy them to a variety of platforms including: iPhone, iPad, Android, xBox, PS3, PC and Mac.

Qualification and recognition
This VET program contributes to your VCE or VCAL. For more information on credit arrangements please visit the website or contact your VET in Schools Coordinator.

Pathway and further study opportunities
On completion of the program, you may further your education in a range of digital media, game development and IT courses including Certificate IV in Digital and Interactive Games/Digital Media Technologies.

You will be able to produce a basic portfolio of work that maybe used when applying for entry level positions in a variety of ICT industries including the games industry.
